

Perryman Company Partners with Apple to Supply Titanium for iPhone Duo Through American Manufacturing Program

FOR IMMEDIATE RELEASE

HOUSTON, Pa. – Today, Apple announced a new partnership with Perryman Company through Apple's American Manufacturing Program (AMP) to supply specialty titanium for their products, including the groundbreaking new iPhone Duo.

As part of the collaboration, Apple has committed up to \$100 million over the next three years with Perryman Company, a family-owned business and global leader in specialty titanium manufacturing. The investment supports domestic production capabilities and strengthens the American supply chain for advanced materials used in next-generation consumer technology.

Perryman's multiple manufacturing campuses in the Pittsburgh, Pennsylvania region, will produce titanium for use in the iPhone Duo, Apple's first foldable iPhone.

The opportunity to support Apple with titanium produced right here in Pennsylvania is a tremendous honor for our company and our employees," said Frank Perryman, President and Chief Executive Officer of Perryman Company. "This partnership reflects the strength of American manufacturing and highlights the critical role that titanium materials play in enabling innovative products. We are proud that Perryman's expertise, built over decades of investment and innovation, will contribute to one of the most exciting new consumer products in the world."

The iPhone Duo features a grade 5 titanium enclosure engineered to deliver exceptional strength. The material provides the durability required for Apple's first foldable iPhone and showcases the performance advantages of titanium in advanced engineering applications.

Founded in 1988, Perryman Company is globally recognized for its vertically integrated titanium operations, supplying titanium products to the aerospace, medical, industrial, defense, and consumer markets. The company's extensive melting, forging, rolling, and finishing capabilities enable it to produce some of the world's most demanding titanium products.

"This announcement underscores the growing importance of domestic production of critical materials," Perryman added. "By partnering with U.S.-based suppliers, companies like Apple are helping strengthen the nation's industrial base while supporting high-skilled jobs and technological leadership."

About Perryman Company

Perryman Company is a family-owned, fully integrated titanium manufacturer headquartered in Houston, Pennsylvania. The company produces titanium ingots, slabs, blocks, billets, bars, coils, and fine wire for customers in the aerospace, medical, industrial, defense, and consumer sectors worldwide. With a commitment to quality, innovation, and vertical integration, Perryman Company is a global leader in specialty titanium manufacturing.
