

Perryman company

Premium Quality **Titanium** Supply for the Additive Industry

Perryman Company is a vertically integrated producer of specialty titanium products. Our operations include melting, forging, and fabrication to finished products. Perryman supplies and services customers in the aerospace, medical, consumer, recreation, and 3D printing/additive manufacturing markets worldwide. As a quality leader in premium titanium supply for the additive industry, Perryman supplies the highest quality wire and bar.

Perryman Advantages

- Clean additive wire for use in wire-fed machines and titanium powder manufacturing
- Spooled wire is free of cast and helix – wire feeds off of spool as straight wire
- Able to supply single spools holding 500 pounds each (227 kilograms)
- R&D quantities available
- All standard grades including 6Al/4V and CPs. Others available upon request

The Global Leader

In Premium Quality Titanium Supply
for the Additive Industry

Perryman company

Perryman **Titanium** Wire & Bar Materials for the Additive Industry
