

EXPANDED MELT CAPACITY

EBCH

VAR

Superior Yielding **Titanium** Ingots

The Perryman Advantage

- State-of-the-art EBCH and VAR furnaces
- Blending expertise – consistent melts
- Melting within tighter tolerances than standards require
- Custom chemistries within grades available
- Competitive lead times

More than 3 decades ago, James Perryman Sr. laid the foundation for our company and established the guiding principle of “good enough, is never good enough.” Today, we continue that focus by delivering the highest quality titanium products available. We have been melting ingots since 2007. Our current capacity is over 26 million pounds annually.

Perryman Titanium Ingots

At Perryman, we have the ability to deliver a wide range of titanium products all designed to meet your needs and exceed your expectations. We achieve this through exceptional raw materials, advanced technology and equipment, and a team of highly trained employees focused on delivering quality.

Ingot Product Details

Grades:

6Al/4V
6Al/4V Eli
3Al/2.5V
CP Grades 1, 2 and 4

Available In:

30" Diameter 12,500 lbs.
EBCH/VAR
33" Diameter 12,500 lbs.
EBCH/VAR/VAR

Specifications:

AMS 4928
AMS 4967
AMS 4965
AMS 6931
AMS 2249
AMST 9047
ASTM B348

Approvals:

Boeing and Airbus

- Custom weights available
- ISO 9001: 2015 and AS9100D certified
- Testing labs are accredited by NADCAP

Trusted Testing Capabilities

Commitment to Quality

Quality first is the operating philosophy of Perryman employees and is at the core of our Quality Policy. The integrity of our product and our name is dependent on each and every employee maintaining the highest standards of conduct and adhering to the quality standards established.
